

Critical Mining Safe Work Practices

Designed as a two day program in the core mining units S1, S2 and S3, this hands-on program will include interactive PowerPoint presentations, structured activities, role specific workshops, role plays and group discussion led by a very experienced and dynamic facilitator. Participants will be able to relate all activities to their role and workplace responsibilities and assessment will be designed around application to workplace operations. This program can be delivered on-site or at a venue of your choice.

Apply Risk Management Processes

S1

RIIRIS301A Apply risk management processes
This unit covers the application of the processes and tasks to conduct inspections and to identify, analyse, assess risks, recommend treatment, contribute to implementation of controls and to monitor risks. It also covers participation in the preparation, testing and documentation of site working instructions or equivalent. This unit has been extensively revised in accordance with the Queensland Mining S1 unit of competency

Conduct Safety & Health Investigations

S2

RIIOHS301A Conduct safety and health investigations
This unit covers the application of safety and health investigative processes at the operational level, including the identification and collection of evidence, the analysis of evidence to identify the reasons for and results of the occurrence or situations, and the identification and documentation of courses of action to resolve and/or prevent reoccurrence of the issues or problems. This is a new unit developed from the Queensland Mining S2 unit of competency.

Communicate Information

S3

RIICOM301A Communicate information
This unit covers the function required to effectively communicate information with other persons in the mining industry. This includes communicating verbally, communicating in written and report form, participating in meetings, making presentations, and participating in operational level negotiations. This unit is a new unit developed from the Queensland Mining S3 unit of competency.
