

Carry Out Risk Management Processes

RIIRIS402A

Critical to Mine Safety

This 2 day program is essential for **supervisors / team leaders** with the responsibility to implement the risk management systems within an established system for a mine site/area, including the application of local hazard identification, formal risk assessment and implementation of risk controls. ***This program has now been upgraded to meet the requirements of RIIRIS402A Carry out risk management processes***

Building on critical knowledge and skills in:

- ***Applying operational safety requirements***
- ***Interpreting and communicating operational hazard-related information***
- ***Scoping risk assessment projects***
- ***Breaking processes or functions into clear steps or components***
- ***Identifying and understanding hazards***
- ***Analysing risks***
- ***Identifying best available control options to address an unacceptable risk***
- ***Maintaining records and reports such as the risk assessment reports and forms***
- ***Coordinating and monitoring actions and responding to changing situations***

The Learning and Assessment Process

The training will be delivered using a highly customised approach, including application activities using workplace examples to support the transfer of learning into the workplace. VIA will consult prior to commencement of training, to customise the learning and assessment activities. The assessment process will meet the unit requirements while ensuring direct on the job application in the workplace.

Our Facilitator

Our specialist facilitators have extensive experience in compliance management and investigation. They are highly credible, with diverse backgrounds including mining experience, senior police investigation and heavy industry, all of whom have developed a sound working knowledge of mining and its critical needs in relation to mine safety and management skills.
